

There is water for farming in and around Melbourne

Water comes from many different sources

People use water of the right quality for their needs

The Water Grid moves water to people where they need it most

Parks and gardens are green, cool, and provide great spaces to relax and play

Fish, birds, frogs and other aquatic life thrive in healthy urban water environments

Water is affordable for everyone

Urban waterways rivers and the bay are protected and enhanced as valued public assets

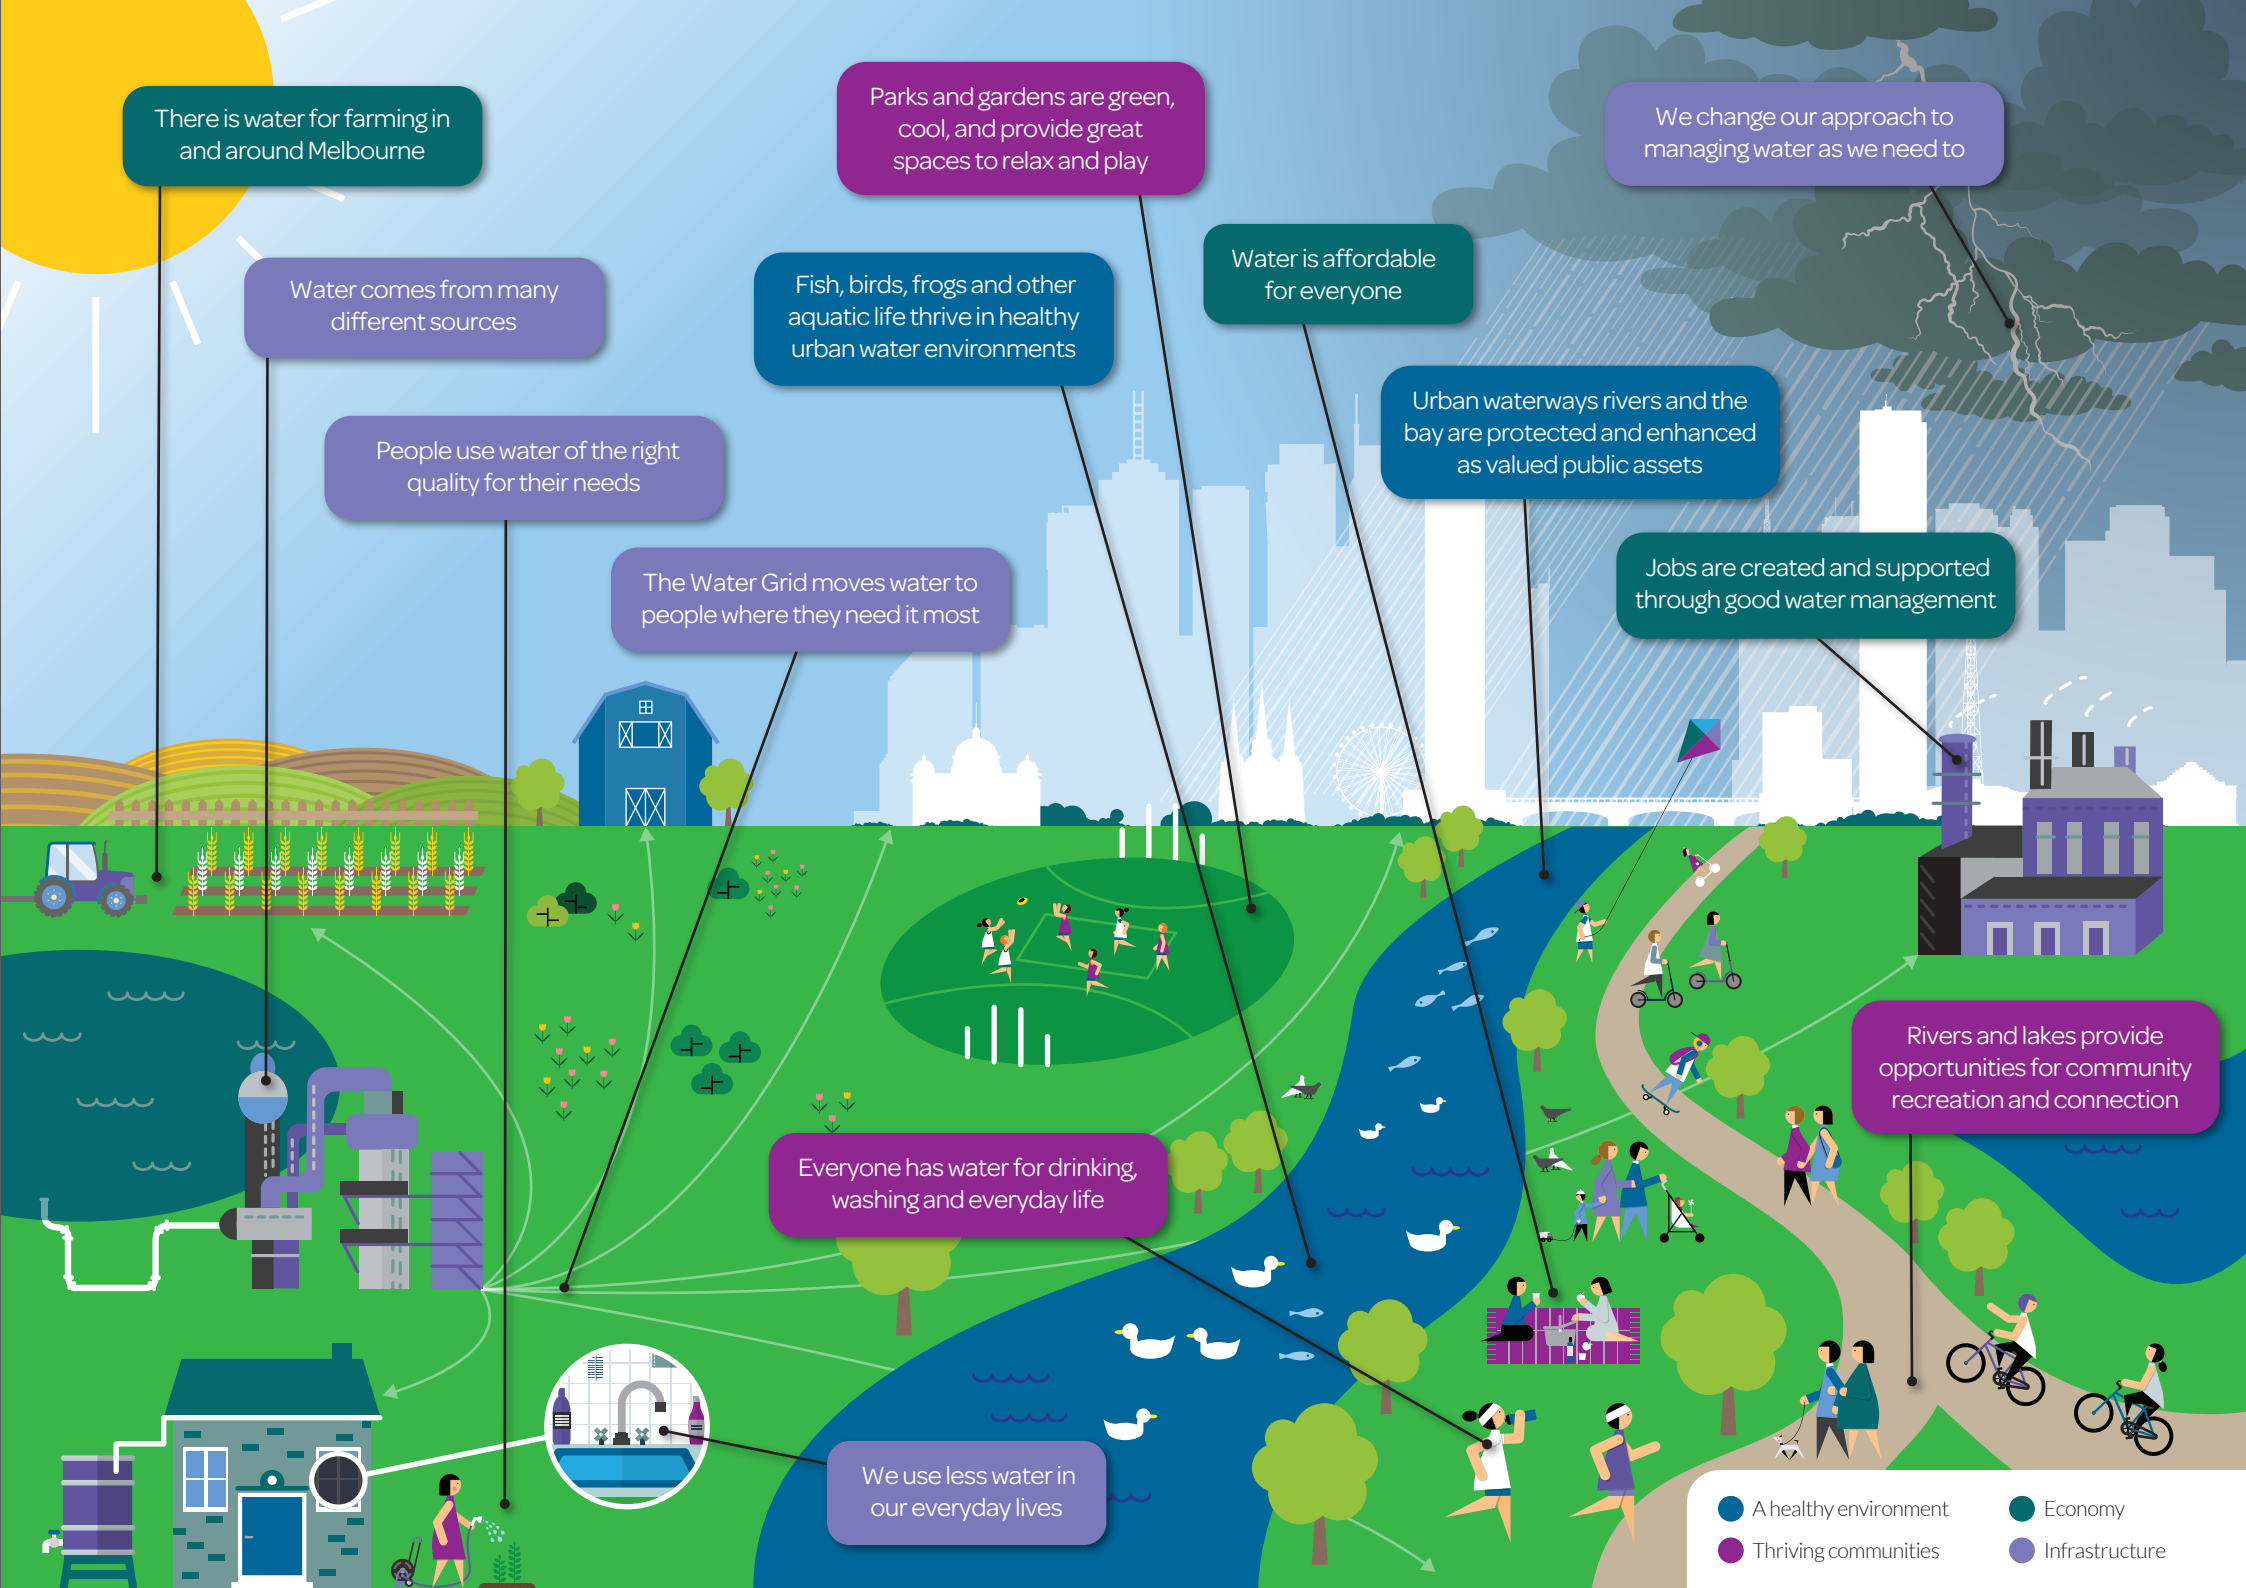

We change our approach to managing water as we need to

Jobs are created and supported through good water management

Rivers and lakes provide opportunities for community recreation and connection

Everyone has water for drinking, washing and everyday life

We use less water in our everyday lives

- A healthy environment
- Economy
- Thriving communities
- Infrastructure
